

## Patient 2 Pre and Post Provocation Case Study

Case history dictated by attending physician

Provocation agents: ACZ nano/ACS 200

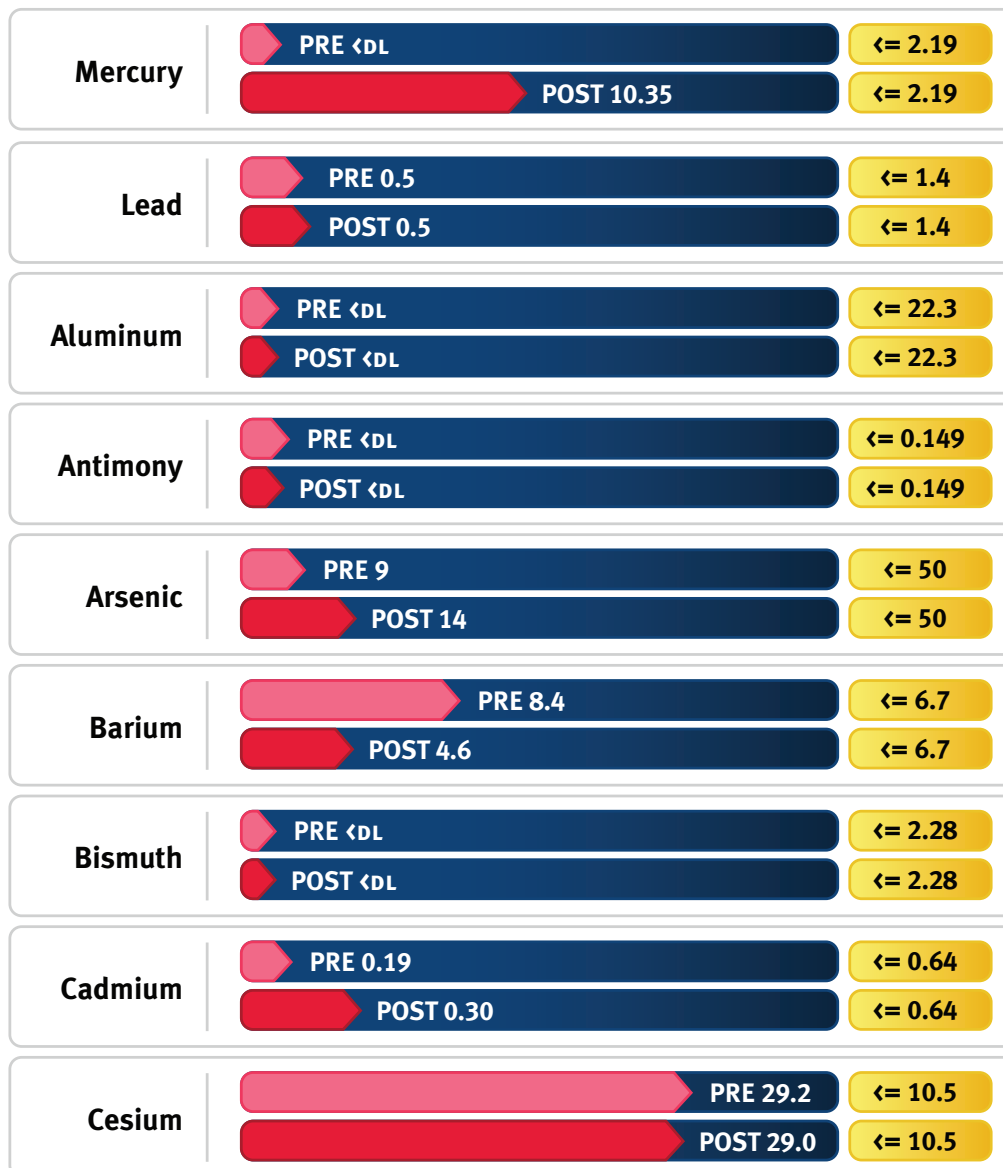

Female, 69. Dx Severe MCS (Multiple Chemical Sensitivity); burning around mouth, lips & face, no prior chelation

**Treatment response:** Much improved after 6 weeks TID with ACZ nano (15 sprays) & ACS 200 (10 sprays), Tolerates foods & fragrances better in the work environment and is now able to continue working.

**Results of 12 Hour Post-Provocation Testing:** Results demonstrate an increased excretion rate of **Mercury 103,500%**, **Tungsten 11,100%**, **Cadmium 157%**, **Arsenic 155%** over Pre-Provocation levels.

### 12 Hour - Toxic Element Provocation Protocol (TEPP):

8am - collect Pre-Provocation urine sample, begin Provocation testing: 40 sprays ACZ nano and 20 sprays ACS 200 orally at 8am, 2pm, 4pm. Collect Post-Provocation urine from 8am until 8pm.
